

Laundry Room

Description: _____

ITEM	STD	OPT	N/A	COST	NOTES
Laundry Room					
DESIGN					
Laundry room contains a desk area					
Tall cabinet for storage of mops, broom, vacuum, ironing board. (See picture labeled Tip #205)					
Built-in ironing board. (Is it located correctly for you? Are you left- or right-handed? Does it swivel, adjust in height, contain hot iron storage? Is there enough room to get around once it is opened?)					
Hanging space for long and short items.					
Folding space: Is there enough countertop space to fold clothing?					
Sorting space: Is there room for built-in storage of laundry hampers or for a free-standing laundry sorter? (See picture labeled Tip # 206)					
Washer and dryer included? (If purchasing the new front-loading machines, notice whether the washer should be on the left or the right in order to prevent the doors from opening into one another. Make sure your plumbing is installed on the correct side.)					
When doors are open for the washer or dryer, are they blocking a walkway or doorway?
